Abdul Mateen

Full Stack Developer

Results-oriented Full Stack Developer with a passion for creating seamless user experiences and solving complex technical challenges. In my previous job, I have developed proficiency in front-end technologies including HTML, CSS, JavaScript, React.js, as well as back-end development using Node.js and MongoDB. A quick learner with strong attention to detail, I thrive in fast-paced environments and enjoy collaborating with multidisciplinary teams to deliver robust web applications.

04/2015 - 05/2017   *%age: 94.54%*

WORK EXPERIENCE

Full Stack Developer
As-Siraat

09/2022 - 01/2023   *Islamabad*

As-Siraat aims to bridge the gap between industry and academia through a digital platform that will help fresh graduate students to improve their employability skills

Responsibilities

- Analyzed the requirements and developed a website for a Startup from the Figma design using the MERN stack. Website Link -> https://as-siraat.com/
- Developed RESTful APIs using the Express framework.
- Practiced Git for version control and have worked with GitFlow.
- Set up the Firebase Storage v9 bucket for the uploading of Student's resumes
- Deployed full stack application to the firebase server using Firebase CLI (command line interface)
- Ensured consistent page appearance/behavior across multiple browsers (IE6+, FF, Chrome, Safari)

TECHNICAL SKILLS

HTML | CSS | JavaScript | React
React-Router-Dom | NEXTjs | TailwindCSS
Bootstrap 5 | Node | Express | MongoDB
git | GitHub | Chakra UI | Redux Toolkit
Material UI | GraphCMS

PERSONAL PROJECTS

As-Siraat (StartUp Website)
- Developed and delivered a website to a Startup using the MERN stack. I worked with the design team in order to optimize the usability of the app for the users.

Portfolio using React and Tailwind CSS
- Crafted an immersive and visually stunning portfolio using the power of React and the elegance of Tailwind CSS, seamlessly blending captivating design with flawless functionality

Blog Application for mathematician
- Built a dynamic blog application for mathematicians using GraphQL, GraphCMS, Next.js, and Tailwind CSS. Seamlessly integrating GraphQL with GraphCMS, the application enables easy content management. Leveraging the performance benefits of Next.js and the sleek design capabilities of Tailwind CSS .

MERN Stack Chat Application (Socket.IO)
- Developed a robust MERN stack chat application, empowering seamless real-time communication. Leveraging MongoDB, Express.js, React, and Node.js, the application delivers a secure and responsive chat platform.

Finance Dashboard
- Designed and implemented a user-friendly finance dashboard app featuring intuitive graphs and customizable metrics, empowering users to make informed financial decisions based on real-time data analysis.

E-commerce Web Shop (progress)
- This application is being made through the stripe payment integration and using headless CMS Sanity.

SOFT SKILLS

Adaptability | Problem Solving

Team work and collaboration
